DETAILED ACTION

1. This action is responsive to the Applicant's amendment filed on 12/18/2006.
2. Claims 1, 3-7, 9, 12-15, 17, 19 have been amended, claims 2 and canceled.
3. Claims 1, 3-7, 9-19 are pending and presented for examination.

Response to Arguments

4. Applicant's arguments with respect to claims 1, 3-7, and 9-19, filed December 18, 2006, have been fully considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

5. Claims 1, 3-7, and 9-19 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter, specifically directed towards an abstract idea.

As claim 1, the claim is directed to a system for matching input data across record pairs of data. The claimed subject matter lacks a practical application of a judicial exception (law of nature, abstract idea, naturally occurring article/phenomenon) since the claim fails to produce a useful, concrete and tangible result. Specifically, the claimed subject matter does not produce a tangible result because the claimed subject matter fails to produce a result that is limited to having real world value rather than a result that may be interpreted to be abstract in nature as, for example, a thought, a computation, or manipulated data. More specifically, the claimed subject matter provides for a final result "*a means for applying a set of adjusted rules and weights to similarity scores of the similarity vectors for the pairs of records of the non-training data set to*

Art Unit: 2165

calculate an overall similarity score for each pair of records in the non-training data set" This produced result remains in the abstraction and, fails to achieve the required status of having real world value. As such, claim 1 is not limited to a statutory subject matter and therefore non-statutory.

The dependent claims 3-7, and 9-19 included in the statement of rejection but not specifically addressed in the body of the rejection have inherited the deficiencies of their parent claims and have not resolved the deficiencies. Therefore, they are rejected based on the same rationale as applied to their parent claim above.

Examiner's Remarks

6. The present application has been thoroughly reviewed, upon searching a varieties of databases, the examiner respectfully submits that claims 1, 3-7 and 9-19 would be allowed if the instant independent claim 1 is rewritten to overcome the 35 U. S. C. 101 rejection set forth above.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
